Net pumped	462,020
Source meter	289,260
Flushing	
Recorded loss	
Net to distribution	289,260
Residential meters	211,950
Unaccounted for water	77,310
Percentage of loss	27 %

We have solved our turbidity problem. I have adjusted the pump rate and the back wash rate, and the spike went away. Now I will be reversing the process to see exactly where the problem is at but for now we are well within allowable limits.

I will be attending the WOW conference on March 24th.

We are moving forward on the clean up of trees at the clubhouse. I read the letter to the board and the resident has to understand this is maintenance that should be completed every year

I have had two home owners recently ask about the internet access at the clubhouse or the cabana.
